

Professional Indemnity Appetite

Whether your client is a local accountant, architect, large software developer or a specialist telecommunications consultancy, we have the knowledge, ability and expertise to come up with the PI policy they need, working with you to ensure that we understand and meet their requirements. If your client needs it, we can also offer Public & Products Liability and Employers Liability under the same policy.

We're happy to underwrite both the traditional professions and the vast majority of companies or individuals who have to carry E&O cover, providing A rated* cover on all PI risks. We can also provide PI for overseas domiciled subsidiaries as well as the USA. Our team write primary and excess layer PI.

Listed below are the main professions we underwrite. If you don't see a particular profession listed then please ask us - our underwriting contacts are provided on the back page.
